DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
2. The disclosure is objected to because of the following informalities: There is no abstract of the disclosure presented on a separate sheet as required.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 8-9 are rejected under 35 U.S.C. 101 because the claims are directed respectively to a computer program and to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical “things” nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

Allowable Subject Matter

3. Claims 1-7 contain allowable subject matter over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a device for recording real time information on a record carrier. The independent claims identify the feature of “at least one bridge clip for linking a first and a second playitem via the bridge clip, a bridge clip stream comprising re-encoded real time information based on an ending part of the first clip and a starting part of the second clip; the file subsystem being arranged for copying

Art Unit: 2621

additional units of real time information from a part of the first clip stream before the ending part of the first clip and/or from a part of the second clip stream after the starting part of the second clip for creating the bridge clip stream having at least the predefined extent length, and the application subsystem being arranged for adapting the application control information for accessing the bridge clip stream including said additionally copied units". The closest prior art, Blacquiere discloses a conventional video recording apparatus, either taken singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lane et al discloses a video recording/reproducing apparatus.

Blacquiere discloses a conventional video recording apparatus.
